MODULAR PUMPTRACK

FUN FOR ALL WHEELS ALL AGES

PARKITECT.COM.AU

What are Modular Pumptracks?

A Modular Pumptrack is the ultimate riding playspace solution. Perfect geometry guarantees the safest and most enjoyable fun for all ages who love riding their bikes, scooters and skateboards

Parkitect's unique Modular Pumptrack design is classic and extraordinary.

It inspires safe active fun for all ages who love to ride bikes, scooters, skateboards and skates.

The customisable system uses engineered, certified modules to create bumps and turns designed to propel riders around the track without pedalling.

Modules are made from either fibreglass or precast concrete.

Parkitect's Modular Pumptrack system is unlike any other pump track on the market.

With perfectly designed and engineered modules, we create a pump track with guaranteed geometry for the safest fun and with unlimited track design possibilities.

Every Modular Pumptrack is a unique riding play space solution designed precisely for the site, budget and needs of the client.

Best of all, our track design service is free with quotes.

“

The feedback from users, parents and staff has been overwhelmingly positive, so much so that Council has now decided to purchase two additional tracks to meet the needs of our rural residents. We highly recommend Parkitect and their Modular Pumptracks.

Bland Shire Council - NSW

Who is Parkitect?

Parkitect is Australia's leading supplier of extraordinary pump tracks that inspire safe active riding fun

At Parkitect, we're passionate about providing regional towns, local neighbourhoods, holiday parks and schools with safe, fun pump track solutions.

As the exclusive importer and distributor of the European Modular Pumptrack system in Australia and New Zealand, riding bikes, scooters, skateboards and skates is an age-old activity enjoyed by children, teenagers and adults.

Modular Pumptrack offers a classic activity in a new modern way, for people of all ages who love riding

their favourite set of wheels, whether just for fun and recreation, or for fitness and health.

Our certified pre-engineered modules takes the guess work out of track design, significantly reducing the time (and cost) it takes to produce a guaranteed rideable result.

Using the latest CAD software and 3D design software our design team can develop a range of options for you to choose from.

Proven performance. Outstanding quality.

PARKITECT®

All New All Fibreglass

The new all Fibreglass Modular Pumptrack is the ultimate in design and material for optimum riding safety and fun. This new edition is made using GFRP (glass fibre reinforced polymer) with a proprietary high grip riding surface and a tubular steel frame.

Tracks can be assembled easily above-ground. A highly resilient type of pump track material, composite fibreglass offers the best performance when it comes to harsh weather conditions & heavy-use. Parkitect modules are pre-engineered, designed and certified to guarantee the perfect riding geometry for a superior pump track experience.

Fibreglass Modular Pumptracks offer significant advantages over other designs. Firstly, the aesthetic quality is outstanding. The design of this pump track is sleeker, rounder and lower to the ground. It's 30% wider than our earlier designs and the fully hidden hardware means even safer from vandalism and safe for users.

Key features:

- Complies with new standards AS EN14974:2021
- Fast and simple to install by non-specialised trades
- Super cost effective – install around existing infrastructure and landscaping
- Easy to landscape
- Proprietary reinforced fibreglass high grip riding surface
- Choose from standard track layouts or have a track designed just for you
- Ecological resins and paints

The Modular Pumptrack difference

Expertly pre-engineered
& certified

Cost efficient riding
activity solution

Proven track design for
rider safety & enjoyment

Precast Concrete

Precast Concrete Modular Pumptracks offer a truly sustainable, low maintenance solution for community play spaces, parks and public areas. They can be installed above ground or moulded into the terrain to achieve a natural look and feel that blends seamlessly into the surroundings. They remain mobile, which means that they can be installed without lengthy and expensive project documentation, giving them a significant advantage over “pour in place concrete” and other permanent structures.

Key features:

- Complies with new standards AS EN14974:2021
- Guaranteed geometry with every design
- Low impact on the environment
- Installed above ground or into the terrain
- Clean, quiet aesthetically pleasing riding solution
- Fast and simple to install by non-specialised trades
- Cost efficient permanent solution with flexibility to be easily upgraded or changed
- Proven safety with high grip riding surface

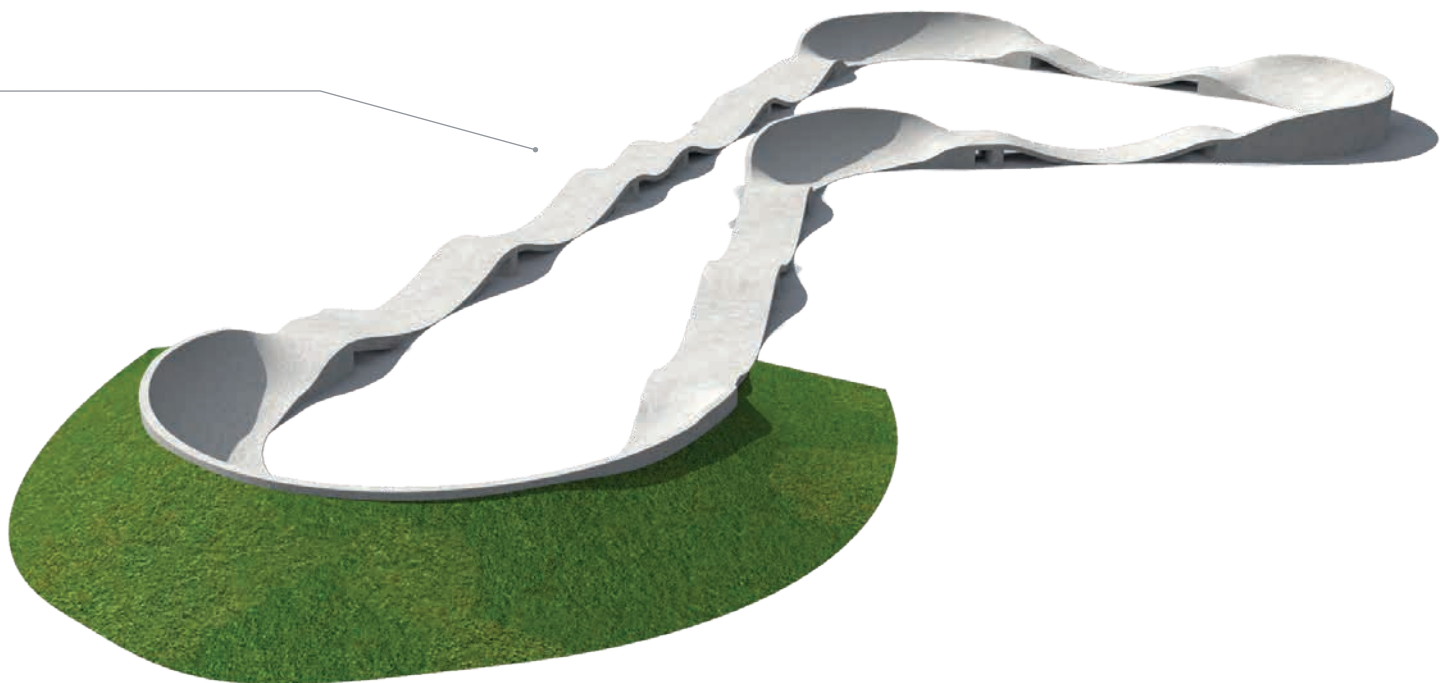

Aesthetically pleasing riding play-space for public areas

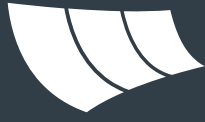

Guaranteed geometry equals a proven riding result all year round

Resistant to vandalism and weather including rain, frost & heat
